

## Example for Japan research

### Origami

It is hard to say when origami started, but some think that it started soon after paper was invented. In China and Japan, it was used as a part of spiritual life. It became an art form in the 20<sup>th</sup> century, due to the master Akira Yoshizawa who figured out a way to write the directions down. Origami is enjoyed by people all over the world.

3 facts:

Origami usually is made with a square piece of paper.

You don't need any tools to do origami.

Most origami involves only folding and no cutting.
